PRINCIPLES OF EXECUTION, LLC

Building the foundation for effective execution!

Data Driven Portfolio Strategy

What we promise?

- ➢ Enhancing client's programs and project expertise and management capabilities, which results in increase project throughput and speed to market.

- ➢ Increasing client's effectiveness and efficiencies through process improvement, which results in a reduction of operational cost to the organization.

- ➢ Improving client's visibility in managing critical resource utilization and availability across the project portfolio environment, which results in enhanced collaboration.

- ➢ Providing answers to critical portfolio questions through the development of SMART reports, which results in increased efficiencies and better decision making at the senior executive level.

What clients and colleagues are saying?

Gerald had the very challenging task of introducing a program management and governance capability at a large law firm. He approached this challenge with skill and dexterity, delivering a world class capability providing insights and intelligence into the project portfolio. This informed the leadership and management teams' decision making process in a way that was not possible before.

Stephen Ray (Chief Technology Officer at Cobb Systems Group)

Gerald is an excellent Project Management Professional and has strong technical skills and a great work ethic. Gerald has a deep understanding of how to apply project management principles and technology to support project delivery in a controlled manner. He is thorough, hardworking, has great presentation capabilities, and exhibits integrity in everything he does. While at Freddie Mac as a consultant, Gerald provided us with excellent guidance and was a key contributor to our success in gaining support of the Project Server and SharePoint platforms. I would highly recommend him for any opportunity for which you might consider him.

Kevin Brendel, PMP, CSM Program Manager at Agilex Technologies
